

What to do before using a PORTABLE GENERATOR

Prepare

Install battery operated carbon monoxide (CO) alarms throughout your home; ensure they are working properly.

Position

Place a portable generator at least 20 feet from windows and doors; do not use one in a garage or carport.

Read

Carefully review and then follow all manufacturer's instructions.

Protect

If it is wet outside, keep it dry by placing it on a tarp. Position it under a portable canopy (not a carport).

Refuel Safely

Turn off your portable generator and let it cool down before refueling.

Inspect and Maintain

Inspect a portable generator before each use and make sure it is properly maintained.

Using a portable generator can be useful during an outage; however, use one correctly to prevent CO poisoning and to stay safe.
